Quality**

ABOUT US

The rigours of having a lab that meets the highest standards of technology are daunting, but not to a quality control expert with 16+ years of valuable industry experience.

LS Scientific is dedicated to empowering Manufacturers, and Scientists in their pursuit of product excellence. It is the company's mission to rid the world of substandard products and improve the quality of human life.

LS Scientific's portfolio encompasses chemicals, essential glassware and consumables, high-tech equipment, and indispensable PPE. With an uncompromising commitment to quality, LS Scientific is your unwavering partner in reshaping and equipping the scientific industry.

BUSINESS GOALS & OBJECTIVES

To ensure superior standards and enhance the quality of finished products, using innovative technology to satisfy global scientific requirements.

MISSION

To rid the world of substandard products and improve quality of life.

VALUES

Our customers are kings, and we are passionate about maintaining the high standard of quality we preach. As such, we infuse honesty, integrity, and trust into all aspects of our business.

| OUR PRODUCTS

LABORATORY CHEMICALS

We have a wide range of chemicals and reference standards guaranteed to give you authentic results in your laboratory analysis.

SUPPLY OF EQUIPMENT

State-of the-art equipment from the most basic analytical methods, we guide you to the peak of automation. With over fifteen years in the business of quality solutions, we have written our name in GOLD.

GLASSWARE & CONSUMABLES

With a rich stock of premium quality glassware and consumables from world best brands, you can be sure to never run out with us.

SAFETY & (PPE)

We understand that safety is a top priority for everyone. That's why we offer an extensive catalogue of Personal Protective Equipment. We are your trusted partners for safety.

Heating & Cooling Systems

Oven

key features include:

- Intuitive and easy-to-use control menu
- Accurate temperature control
- Uniform heat distribution
- Timer and alarm functions
- Energy-efficient operation
- Multiple sizes and configurations available

Refrigerators

key features include:

- Energy-efficient design for cost savings
- External digital temperature display for easy monitoring
- Door lock for secure storage
- Alarm system for added safety

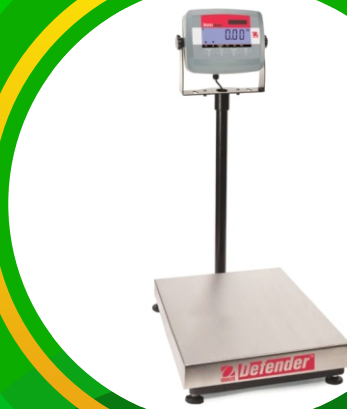

Analytical and Industrial Weighing

Analytical & Precision Balance

key features include:

- High accuracy and precision
- User-friendly operation
- Wide range of capacity and resolution
- Easy calibration and maintenance

Industrial Balance

key features include:

- Multiple weighing modes
- Advanced connectivity options
- Durable construction

Chromatography

HPLC

key features include:

- High sensitivity and resolution
- Versatile and adaptable to various applications
- Robust and reliable performance
- Easy maintenance and user-friendly operation

Columns

key features include:

- High reproducibility and consistency in performance
- Different particle sizes and pore sizes available
- High quality and durability

Sterilisers and Biomedical Safety Equipment

Autoclave

key features include:

- Wide range of sizes
- Advanced control system for easy operation
- Energy-saving technology
- Durable construction
- Safety features to ensure safe operation and prevent accidents

Laminar Flow Cabinet

key features include:

- Easy-to-use controls
- High efficiency particulate air (HEPA) filtration

Instruments

pH Meter

key features include:

- Easy to use and calibrate
- Wide range of applications and measurement scales
- Compact and portable designs available (handheld/benchtop)
- Seamless data transfer

Liquid Handling

Automatic Pipette

key features include:

- Precise metering, measurement, and preparation of liquid samples
- Fully Autoclavable, UV resistant
- Easy to sterilise

Laboratory Chemicals & Agars

Chemicals

key features include:

- Wide range of chemicals and grades
- High purity and quality
- Reliable supply chain and delivery
- Competitive pricing

Agars

Our range of agars includes a variety of different types to suit different applications. They are manufactured to the highest standards to ensure consistent quality and come in a range of sizes to suit your needs.

Water Purification

key features include:

- Multiple configurations available
- User-friendly interfaces for easy operation
- Supports different levels of purity (Type 1, Type 2, and Type 3 water)
- Efficient water usage

Automatic Titration

Key features include:

- Simplified burette preparation
- Step-by-step guidance for preparing titrations
- Reliable and reproducible endpoint evaluation
- Automatic calculation and documentation of results
- Safer handling of chemicals
- USB connectivity, enabling easy integration with other devices and software

Glassware and Plasticware

Key features include:

- Wide range of products and sizes
- High-quality materials and construction
- Precision and accuracy
- Easy-to-use and clean
